

Contact Information

Electronics and Communication Engineer

Name: Fawzy Nissem Fawzy Wahba

Age: 24 Years

Mobile: +201018174206

Email: fawzy346@gmail.com

Portfolio: <https://fawzy.great-site.net>

LinkedIn: <https://www.linkedin.com/in/fawzy-nissem-719082195>

Address: Kafr Elshiekh – Egypt. (Flexible and Open to relocation)

Military Service: Completed with “Excellent Conduct”, **Mar 2025**

Profile Summary

A passionate and detail-oriented Electronics and Communication Engineer with a strong foundation in embedded systems, PCB design, and software development. Proficient in programming languages such as C/C++, Python, and Dart, with hands-on experience in Flutter development, IoT, and microcontroller-based projects. Adept at problem-solving, troubleshooting, and working in collaborative environments. Eager to apply technical skills and innovative thinking to develop cutting-edge solutions in embedded systems, automation, and software development. Open to relocation and new challenges in the technology sector.

Education

B.Sc. in Electrical Engineering, Electronics and Communication Department – Faculty of Engineering, Kafr Elsheikh university, Egypt. **June 2023** **Grade:** Good

Graduation Project: Electronically Steerable Transceiver using STM32 MCU and 4x4 Butler matrix Antenna. Designed and developed the PCB layout and schematic design using Altium Designer. Additionally, contributed to MCU software development using Embedded C. **Grade:** Excellent

Training & Courses

* References Available Upon Request.

- **Network Distribution Training** – abu qir power plant (2021)
- **CS50 Programming course** – edX (2022)
- **C/C++ Programming Course** – Coursera (2021)
- **Embedded Systems Course** – Coursera (2023)
- **Python Programming Course** – Coursera (2022)
- **MATLAB Course** – Coursera (2021)
- **Linux Essentials** – CyberTalents (2022)
- **Automotive & Electronic IP Training** – Eitesal Agency & Siemens (Hands-on with Tiva C MCU, 2023)
- **HCIA (Huawei Certified ICT Associate)** – NTI (2021)
- **Optical Distribution Networks (FTTH)** – NTI (2021)
- **CCNA & CCNP Course** – Youtube (2023)
- **Cybersecurity Fundamentals** – CyberTalents (2022)
- **CISCO Cybersecurity Course** – NTI (2022)
- **Soft Skills Training** – NTI (2021)
- **Hackerrank 5 Stars (C, C++, Problem Solving) Training** – HackerRank (2023)

Projects & Experience

- Explored and Worked with **Embedded Systems, Flutter development, and web backend design**, eager to pursue opportunities in these fields.
- Trained on Tiva C Series TM4C123G **ARM-Cortex M4** MCU, Completed Hands-on Training and Developed basic Projects.
- Worked as a freelancer in:
 - **Accounting Program** for a small advertising company using **Python, Tkinter** interface and **SQLITE** Database calculating all the Income and the Expenses using data organizing algorithms.
 - Web Scraping Projects using Python.
 - Developed a **web scraping tool** using requests to extract daily readings from the **ST-Tekla website** and display them in real-time. Designed a **Tkinter UI** for seamless data retrieval and automated **PowerPoint generation** using pptx. This solution reduced manual effort and improved accessibility for church attendees.
 - Developed **automated web scraping scripts** using requests, matplotlib, and pandas to extract and visualize large datasets. Implemented **data filtering and plotting techniques** to generate actionable insights. Designed functions for **technical analysis indicators**, optimizing trend analysis and forecasting.
 - Android flutter Applications
 - **Dental clinic records**: Developed a **Flutter-based** dental records app to document patient history, visits, treatments, and dental charts with an intuitive UI for efficient record management.
 - **WhatsApp automation**: Developed using **Flutter** and **Java functions**, enabling the automated sending of messages without human intervention. reducing manual effort and saving time.
 - **smart home application manager**: Developed using Flutter, leveraging HTTP requests via an ESP8266 backend server for real-time relay control.
- Developed a **smart home automation** solution utilizing an ESP8266 MCU with an integrated WiFi module as the backend server to process requests and control devices. Additionally, integrated Alexa voice command functionality to enable seamless hands-free operation and enhance overall user experience.
- Personal **Portfolio** Website using PHP for backend and HTML, Bootstrap for the frontend.

Skills

- **Hardware & Embedded Systems:**
Linux – Arduino – IOT – PCB Design – Microcontroller Architecture – Assembly – RF Design
- **Programming & Development:**
C/C++ - Embedded C – Python – MATLAB – Dart – Flutter – SQL – PHP – HTML – Bootstrap – CSS – Problem Solving
- **Tools & Platforms:**
Git – GitHub – kiel – STM32CubeIDE – Altium – Proteus – CST Design – CCNA – HCIA – Wireshark – burp suite – Microsoft Office package (Word/ Excel/ PowerPoint) – Adobe (Photoshop/ premiere) – Blender
- **Soft Skills:**
Clear Technical Communication – Active listener – Presentation Skills – Analytical thinker – troubleshooting – Team Worker – Adaptable – Multitasking – Problem Solver

Languages

- **Arabic:** Native
- **English:** Excellent Work Proficiency
